Printing

Finally, a printer that's good for the environment *and* your wallet.

Get ultra-high speed, low-cost operation with the environmentally friendly RISO FT color inkjet printers.

First color print in less than five seconds.

There's no time to waste with RISO FT color inkjet printers. These high-performance models print up to 140 pages per minute. Get crisp, vibrant colors from fast-drying oil-based ink that minimizes smearing and paper curl. The stationary print heads deliver high-quality printing at high speeds and improved reliability. Get the job done, quickly and efficiently.

Fast speed, low cost to run.

Advanced design keeps energy consumption low, even during continuous high-speed printing. Rapid print time reduces labor and electricity costs. Simple inkjet mechanism is durable with few replacement parts, resulting in higher reliability and lower cost to operate. Doesn't generate heat, like toner printers, or require the purchase of additional consumables.

Environmentally friendly, workplace respectful.

Virtually no harmful emissions are generated, including ozone and toner particles. Operates on standard power with an energy efficiency that's vastly superior to other printers running at the same speed. Produces less waste due to no drum or fuser units, like those found in toner printers. Outstanding capabilities in a small, efficient footprint.
